

Out students), and X51 (average distance between “kantor desa”(village office) and “kantor kabupaten” (district office)). Very backward and most backward regions in eastern part of Indonesia were mostly influenced by X11 (the percentage of poor people), X12 (poverty index), X22 (the percentage of malnutrition children under five), and X66 (the percentage rural areas with critical land). Hence, government should focus their policy based on these factors.
