

LIST OF TABLES

1	Specific information of Sentinel-1	6
2	Accuracy of EnMap Box regression workflow	10
	Accuracy of random forest model	11
	Accuracy of transfer soil moisture model	13

LIST OF FIGURES

1	Research location	3
2	Research workflow	4
3	Field documentation during ground measurements (a), wet soils (b), over rice fields (c)	5
4	Sentinel-1 imagery on November 5, 2020 acquisition	9
5	The relationship between backscatter and soil moisture at first location (a) and second location (b)	9
6	Performance of soil moisture model in EnMap Box	10
7	Correlation between observed and predicted soil moisture from random forest modelling before tuning (a) and after tuning model (b)	12
8	Importance variable to predicting soil moisture	12
9	Predicted soil moisture at location one	12
10	Observed and predicted soil moisture	14
11	Predicted soil moisture using random forest regression model with highest accuracy	14
