### STATEMENT OF UNDERGRADUATE THESIS, SOURCES OF **INFORMATION, AND COPYRIGHT TRANSFER**

I declare that the undergraduate thesis entitled "Increased Fixation of N<sub>2</sub> by Bacteria after Addition of Magnetite and Chitosan-Magnetite" is my work and supervised by Dr. Deden Saprudin, M.Si. and Ir. Fahrizal Hazra, M.Sc. and has not been submitted in any form to any university. Sources of information derived or quoted from other authors have been mentioned in the text and listed in the Bibliography at the end of this undergraduate thesis.

I delegate the copyright of my paper to IPB University.

#### PREFACE

—Kubulatkan tekadku untuk menyelami dengan hikmat segala yang terjadi di bawah empat penjuru langit; dan الله menawarkan sedikit pengetahuan-Nya, untuk membarui hati, agar aku tidak tersandung batu tajam—

Praise to the Lord, هالله for all His gifts to complete this scientific work. The theme chosen in the study conducted from January 2023 to April 2023 is materials science-microbiology, titled: "Increased Fixation of N<sub>2</sub> by Bacteria after Addition of Magnetite and Chitosan-Magnetite".

My gratitude goes to my father and mother (Adnan Yahya Nasution and Rosna Nasution); and my sisters and brothers (Aysah Purnama Nasution, Muklis Ardiansah Nasution, Ali Nurdin Nasution, and Ahmad Tabrani Nasution), who have provided support, prayers, and compassion during the author's higher education at IPB University.

Thank you to the supervisors, Dr. Deden Saprudin, M.Si. and Ir. Fahrizal Hazra, M.Sc. has guided and advised a lot. Acknowledgments were also conveyed to academic supervisors, seminar moderators, and examiners outside the supervisory commission. In addition, the author's award was conveyed to the staff of the Analytical Chemistry Laboratory, Department of Chemistry, IPB University (Ms. Nunung Nuryanti and Mr. Kosasih); staff of the Soil Biotechnology Laboratory, Department of Soil Science and Land Resources, IPB University (Ms. Asih Karyati); and also to my friends; Neng Dita Nur Fadilah and Anggitha Tambunan (Biology 56, IPB University); Sekar Kusuma Febrianti, Siahaan Rafael, and Leonie Christy Janet Pelupessy (Biochemistry 56, IPB University), who had helped during data collection. May this scientific work be useful for those in need and to advance science.

#### LIST OF TABLES

Addition of materials to create media	4
Stock NH <sub>4</sub> Cl 5 ppm pipetted and final concentration (ppm)	5
Colonies formed on nitrogen-free media	11
NH <sub>3</sub> -N concentration (ppm) in 1 ml sample	13
Effects of Fe <sub>3</sub> O <sub>4</sub> use on nitrogenase activity and leghaemoglobin content	
in Rhizobium inoculation (De Souza-Torres et al. 2021)	14

#### LIST OF FIGURES

ersi.	FTIR spectra of synthesized Fe <sub>3</sub> O <sub>4</sub> (black), CS-Fe <sub>3</sub> O <sub>4</sub> (red), and CS	
ţ	(blue)	8
2	Diffractogram on synthesized Fe <sub>3</sub> O <sub>4</sub> and CS-Fe <sub>3</sub> O <sub>4</sub> versus Fe <sub>3</sub> O <sub>4</sub> card	
	(ICSD number 53412)	8
3	SEM images of synthesized Fe <sub>3</sub> O <sub>4</sub> (a and b) and CS-Fe <sub>3</sub> O <sub>4</sub> (c and d) with	
	magnification of 1000×; sequentially from left to right are SE and BSE	9
4	Fe <sub>3</sub> O <sub>4</sub> (left) and CS-Fe <sub>3</sub> O <sub>4</sub> (right) SEM image literature (Hariani <i>et al.</i>	
	2013; Pham <i>et al.</i> 2016)	9
5	EDX spectra of synthesized Fe <sub>3</sub> O <sub>4</sub> (black) and CS-Fe <sub>3</sub> O <sub>4</sub> (red)	10
6	Colonies formed under a microscope after gram staining	11
7	Means plot (SE as error) the concentration of NH <sub>3</sub> -N	13

# IPB University
