ABSTRACT

HANIFAH MAILANY. Study on Factors Affecting Student Satisfaction in the Implementation of Education in Institut Pertanian Bogor. Under direction of JONO M. MUNANDAR and MIMIN AMINAH

University as one of the educational service organization now experiencing fundamental alterations which are not merely caused by developments of science, technology, and art but also by public expectations toward the role of college in shaping the future. To fulfill it the university must continuously increase the efforts to obtain the public trust through increasing in quality assurance, quality control, and quality improvement to meet the need of the alterations. For those purposes, university has to evaluate the quality of its educational services. Evaluation on service quality make us knowledgeable what is actually expected by student and their perception in received service quality. This means that university have to attract student candidate as a service user and also maintain confidence through creating student satisfaction, and give alternative recommendation strategy which can be useful for IPB improvement and expansion. To measure the student satisfaction, this research applies IPA and CSI methods, while to analyze student’ satisfaction of service attributes which related with confidence and performance of students, using SEM purposed to look for the biggest factor that influence most. Based on the analysis, this research found that assurance and reability influence positively toward satisfaction. In addition, satisfaction influenced positively toward confidence. Furthermore, based on IPA the research found that the most important factor needs improvement is the attitude of the administration staffs in serving (Diploma Program); the convenience of the room used, facilities, and cleanliness, accuracy of grade information (GPA), campus security, responsiveness of the administration staffs to handle complains, retest in due time (Undergraduate Program); convenience of the room, facilities, cleanliness, and bathroom cleanliness, accuracy in providing schedule, responsiveness of the administration staffs to handle complains (Postgraduate Program).

Keywords: service quality, satisfaction, confidence, student performance, IPA-CSI, SEM
