ABSTRACT

DINA RETTHA. Evaluation of “Paket C” in Community Learning Center 17 Penjaringan, North Jakarta. (Supervised by SARWITITI SARWOPRASODJO).

The purpose of this research was to evaluate the program Paket C at PKBM Negeri 17. Based on the results of research to the 30 residents studied at third grade, obtained results that the quality of the teachers significantly affect the level of attendance. While the factors related with the activity are the level of motivation, level of family support, and quality of teachers. The results of this study also showed that the level of knowledge did not affect significantly to the level of attendance and level of activity, whereas attitudes towards sustainability education has significant effect with the level of activity which means that more active the citizens studying in the following learning activities will be the attitude toward the sustainability of the higher education.

Keywords: evaluation, Paket C, attitude
