ABSTRACT

ARI WAHYU W. Institutional Sustainability Analysis and Level of Group Participation in SL-PTT (Case: Gapoktan Jaya Tani in Cibunian Village, District Pamijahan, Bogor Regency). Supervised by FREDIAN TONNY NASDIAH.

This research analyzes the sustainability of Gapoktan ‘Jaya Tani’ institutional. This study using a quantitative approach with survey method. Respondents in this research are farmers from Gapoktan members who are currently active in the activities of the SL-PTT. They were 30 people, they came from three groups of farmers with low levels of ability, medium, and high, with the ownership of land is narrow, medium, and large. The purpose of this research are 1) Analyze the socioeconomic characteristics of Gapoktan ‘Jaya Tani’ members and its relation with the level of individual participation in the program SL-PTT, 2) Identify the level of management, the level of democracy, the level of transparency, accountability, and the level of the power of institutional network that is built up, 3) Identify the level of group participation in SL-PTT program, and 4) analyze the extent role of institutional sustainability against the participation of the group in the program SL-PTT. The results of this research show the sustainability of Gapoktan ‘Jaya Tani’ institutional is sustain because the level of management is high, and the principles of Good Governance (democracy, transparency, and accountability) works well in Gapoktan. Sustain category of Gapoktan Jaya Tani is still at the lowest level cause of the level of group participation in SL-PTT program which is still at the level of placation (degree of tokenisme), at this level the communities have influence even though in some ways is still determined by people that has power.

Keywords: sustainability institutional, management, democracy, transparency, accountability, institutional networking and participation.
