Study on Landscape Design Process of Nature Tourism of Peucang Island
Ujung Kulon National Park in PT. Idea Consultant

Abstract

Nowadays tourism is a basic requirement for society, specifically to eliminate impact of the routine works. Indonesia has a high richness and diversity in a variety of natural formations, historical structures, cultural practices, and other resources related to tourism development. One of the tourism development is nature tourism, where the activity of nature tourism industry cause minimum impact to damage the existence and preservation of natural resources. Ujung Kulon National Park (TNUK) is one of nature tourism destination in Indonesia. TNUK as a conservation area requires landscape planning and design for the development of nature tourism activities. Therefore it is necessary to study the landscape design for the development of nature tourism in TNUK. A qualified nature tourism areas could be created with a good design through the right process. PT. Idea Consultant is a company engaged in the field of landscape planning and design, especially in conservation areas. By doing an internship program at PT. Idea Consultant, student learned about landscape design process by working on a project about study the landscape design for the development of nature tourism in Peucang Island, TNUK.
