Preface

Alhamdulillah, thanks to God, the Almighty, finally we were able to publish the Proceedings of The Second International Symposium on Temulawak. It is now ready for distribution and circulation among the related researchers, industries, and scientists around the world.

On behalf of the Scientific’s Team, we would like to express our sincere appreciation to all members of the Steering Committee and the Organizing Committee for their encouragement, contribution, and assistance during the symposium and made it a successful one. We also grateful to our editors members for their cooperation and valuable contribution during the proceedings preparation.

This proceedings is consisted of 93 titles manuscripts, which are divided into 4 chapters, including botany, efficacy, technology, and toxicity. Almost of the manuscripts are reported as research results on medicinal plants, not only regarding the efficacy but also cultivation and harvesting, written by some local and international experts in their fields. Many of them are attracted the attention due to the information of huge contribution of temulawak both in the traditional and complementary medical systems, and it is intended to raise awareness on the prospects and usage of temulawak as an important alternative commodity.

We do believe that this Proceedings of The Second International Symposium on Temulawak would enrich our knowledge not only in *temulawak* (*Curcuma xanthorrhiza*) but also *takokak* (*Solanum torvum*), soursop (*Annona muricata*), etc., and turn out to be beneficial to mankind. We hope that it will serve as a useful reference for all concerned with the research and sustainable development of related industries.

Thank you very much.

Best regards,
The Editors
Remark from
The Chairperson of Organizing Committee of
The 2nd International Symposium on Temulawak
the 40th Meeting of National Working Group on Indonesian Medicinal Plant

Praise and gratitude towards Allah who has given His Grace so that the Symposium with theme of globalization of Jamu Brand Indonesia could be conducted in IPB International Conference Center on May 24-29, 2011.

As Chairperson of the second International Symposium on Temulawak (*Curcuma xanthorrhiza*), which is also the 40th Meeting of National Working Group on Indonesian Medicinal Plant, I would like to welcome all of you in this symposium. It is my great pleasure that we successfully organized this even with other satellite meetings composing of workshop quality assurance, workshop on natural therapy, business meeting, and scientific output dissemination. We also successfully conducted *Batik* Design Competition and Temulawak Welcome Drink Formula competition. In conjunction with symposium presentation, there is the exhibition of Jamu Products held throughout the symposium period.

The symposium is organized by Bogor Agricultural University (IPB) in collaboration with various government and private institutions as well as foreign parties. The aim of the symposium is to promote the utilization and research development of temulawak as Indonesian medicinal herbal toward healthy life of global society.

The conference has brought 535 participants coming from Indonesia and overseas, 190 research paper with various topics coming from researcher of many institutions, 148 batik designs and 67 workshop participants, 14 invited speakers coming from Indonesia, Japan, Hungary, India, Malaysia, and the Netherlands. There will be 48 oral presentations and 128 poster presentations coming from Indonesia and overseas. In this occasion we also launch the Indonesian road map Jamu and database of Indonesian jamu.

We wish to thank the meeting sponsors and co-sponsors for their support, without which this symposium would not have been possible. Their support greatly facilitated the participation of several researchers from abroad, accommodation, exhibition, small/medium entrepreneurs, and farmers to joint this event.

Ladies and gentlemen, and all participants,
Due to our limitation, we do apologize for any inconvenience during the symposium. We are grateful for the advice and support of the Steering Committee. We wish to the guest speakers, papers contributors, participants and sponsors for their cooperation in organizing this symposium.

Finally, on behalf of the Organizing Committee, I would like to express my gratitude and hoping that all of you will have a nice symposium and enjoy the atmosphere of Bogor “Rain” City.

Thank you,

Dr Min Rahminiwati
Assalamualaikum wr. wb.
Salam sejahtera bagi kita semua
Good morning.

It is our pleasure today that we are all here to attend the important event so called ‘Globalization of Jamu Brand Indonesia’ which consists of several agenda such as the 2nd International Symposium on Temulawak (Curcuma xanthorrhiza); the 40th Meeting of National Working Group on Indonesian Medicinal Plant; Workshops, Business Meeting, Jamu Festival, ‘Jamu’ Batik Design Competition and Temulawak ‘Welcome Drink’ Formula Competition here in Bogor, Indonesia.

As most of us may still remember that 3 years ago, in 2008, I attended ‘Gelar Kebangkitan Jamu Brand Indonesia’ and the First International Symposium on Temulawak. The event was officially opened by the President of the Republic of Indonesia, in Istana Negara, Jakarta; while the symposium was held here in the same place, IPB International Conference Center. Now, we are here again to attend the Globalization of Jamu Brand Indonesia. For the two important events, held in 2008 and 2011, multisectors and international stakeholders are involved, and IPB is significantly taking parts. This clearly indicates that continuous improvement to achieve our goal, to make Jamu for the Word Quality of Live, is really our concern.

We all know that Indonesia is the second largest countries in the world regarding biodiversity. The Indonesian people are used to their natural resources with knowledge they inherited from their ancestors. For example, medicinal plants, animals, and microbes are applied as preventive, promotive and curative alternatives. Jamu has long been known and applied by the society; and nowadays, there is also an increasing tendency of using herbal medicine that is popularly known as ‘back to nature’ for curing diseases worldwide. Jamu business keeps increasing, I heard that almost reach to 10 trillion IDR in 2010; and the support from Indonesian government becomes stronger and real actions have also been conducted, such as: Scientification of Jamu, and Roadmap of Jamu Development will be launched and used as a national guidance for Jamu development. So I believe that through the strong commitment from Jamu stakeholders, our vision that Jamu for the World Quality of Live can be achieved in the near future.
Distinguish Guest, Ladies, and Gentleman,

Bogor Agricultural University (IPB) with its vision to becoming a world class research university with core competences in tropical agriculture and bioscience with entrepreneur character, and one of our mission is to improve the welfare of human beings through the application of developed science and technology are clearly in line with our effort to improve Jamu development.

Within this context, Biopharmaca Research Center IPB keeps focusing its research development and optimizing its efforts to develop qualified biopharmaca products with the support of strong networking with international and national partners. IPB also contributes to the national policy development of Indonesian biopharmaca and committed its existence in education and research development in order to achieve national and international reputation. Currently, IPB is proposing the establishment of Indonesian Biopharmaca Center (IBC) through the support of Japan International Corporation Agency (JICA), and the visibility study of the project is now being conducted. The IBC is expected to be a center of excellence in Biopharmaca Research Development within the country and will contribute to international reputation.

Today as part of Globalization of Jamu Brand Indonesia, we also have an important international event, namely “The 2nd International Symposium on Temulawak (Curcuma xanthorrhiza)” which is conducted by Biopharmaca Research Center, IPB in collaboration with Indonesian government institutions, private sectors, and foreign partners. The theme of the symposium is utilization and application of Curcuma xanthorrhiza through scientific and technological approach toward better and healthy life.

We know that temulawak is known as one of the Indonesian indigenous herbas, which mostly used as the main ingredient for traditional medicine or ‘Jamu’. The popularity of temulawak is increasing along with its commercial use and research result applications. Many scientists have conducted research to reveal the secret of temulawak. Temulawak can be used for various purposes such as for maintaining human health, animal health, and supplement beverages to increase appetite and to keep fresh our stamina. As a continuation of our commitment, IPB is conducting various aspects of research based on temulawak, e.g. brain tonic, cardiovascular diseases, diabetic; further, our research output on avian flu has been registered for patent.

Nowadays, in the middle of modern lifestyle, temulawak is occupying place in our society’s heart and with its various benefits, thus temulawak deserves to be Indonesian “ginseng” herbal. IPB fully support the three days activities involving researchers and scientists all over the world to share their experience and experties which will be conducted in IPB International Convention Center.

We do hope that through Globalization of Jamu Brand Indonesia which are involving biopharmaca stakeholders within the country and abroad, modernization of Indonesian medicine/Jamu will be accelerated and generated benefits to increase our health and welfare.

We would like to ask to the Minister of Coordinator of People's Welfare, Republic of Indonesia to officially open The Globalization of Jamu Brand Indonesia.

Finally, thank you to all of ypu who make this precious event possible.

Billahi taufik wal hidayah, wassalamualaikum wr.wb.

Bogor, May 26, 2011
Rector of IPB,

Prof Dr Herry Suhardiyanto, MSc

1. **The Genetic Variation Analysis of Temulawak (Curcuma xanthorrhiza Roxb.) In Java Island Using Random Amplification of Polymorphic DNA (RAPD) Method**  
   Budi Setiadi Daryono, Hastuti, Tara Puri Ducha Rahmani  
   3  

2. **The Effectivity of Indol-3-Butyric Acid (IBA), 6-Benzyl Amino Purin (BAP), and Sucrose to Improve In Vitro Multiplication of Temulawak (Curcuma xanthorrhiza Roxb.)**  
   Darda Efendi, Cecep S. Darma, Yustika, Delvi Maretta, Churiyah  
   7  

3. **In Vitro Microrhizome Formation of Temulawak (Curcuma xanthorrhiza Roxb.)**  
   Delvi Maretta, Darda Efendi, Sandra Arifin Aziz, Dodo R. Sastra  
   11  

4. **Identification of Genetic Diversity on (Curcuma xanthorrhiza) Collection Clones In Java and Madura**  
   Nur Azizah  
   16  

5. **Responses of temulawak (Curcuma xanthorrhiza) explant in vitro growth in photoautotrof condition**  
   Pertamawati  
   22  

6. **Substitution of Macro Nutrient Using Composite Fertilizer on Micropropagia and Conservaton of Java Trumeric (Curcuma xanthorrhiza) In Vitro**  
   Sitti Fatimah Syahid and Natalini Nova Kristina  
   26  

7. **The Ethnobotanical Aspects of Curcuma spp. In Javanese Traditional Medicine**  
   Mulyati Rahayu, Harini M. Sangat and Vera Budi Lestari  
   29  

8. **Effect of Fertilization by the Local Farmers on Fiber and Curcumin Ingredients of Temulawak (Curcuma xanthorrhiza Roxb.) in Kulon Progo, D.I. Yogyakarta**  
   Fibrianty and Retno Utami Hatmi  
   34  

9. **Micropropagation of Curcuma Xanthorhysa**  
   Tatik Wardiyati, Evi Muakhiroh, Moch. Dawam, Sukendar  
   37  

10. **Feasibility Study Farming Management of Temulawak Curcuma Xhanthorhiza By Using Different Seed Rhizome Size**  
    Ermiati and Sukarman  
    40  

11. **Yield Stability Evaluation on Six UB Clones of Temulawak (Curcuma xanthorrhiza Robx)**  
    Kuswanto and Nur Azizah  
    45  

12. **The Use of Biopesticide for Increasing Ginger**  
    Noorwtri Utami, Jeni Hariyanti, Lukita Devy, Arief Arianto  
    48  

13. **Induction of Flowering in Large White Ginger (Zingiber officinale Rosc.) using Paclobutrazol**  
    Melati, Palupi E R, Bermanie N  
    52  

14. **Seven Species of Endangered Medicinal Plants (Akar Kuning, Gaharu, Kapung-Kapung, Kempas, Kulim, Pasak Bumi, and Pulai) at Bukit Tigarupuluh National Parks**  
    Francisca Murti Setyowati and Wardah  
    56  

15. **Growth and Bioactive Compound of Guava (Psidium guajava) on Different Frequencies of Leaf Harvesting**  
    Sandra Arifin Aziz  
    62  

16. **Seeds Corypha: Medicine Properties and Distribution in Purwodadi Botanic Garden**  
    Rony Irawanto  
    67  

17. **Plant Damaging Organisms Associated With King’s Bitter Plant (Andrographis paniculata) in West Java and Their Recommended Control Measures**  
    Setyowati Retno Djiwanti  
    72  

18. **Medicinal Plants Species in Mount Merapi National Park before the Eruption in 2010 and Its Cultivated in Bogor Botanical Garden**  
    Sudarmono, R. S. Purwanto  
    79

    Tri L. Mardiningsih and Dewi Sartiami  
    87  

21. **Growth and Production of Portulaca oleracea L. at Different Plant Ages Affected By Poultry Manure**  
    Maya Melati, Sandra Arifin Aziz, and Mohammad Tarih Suseno  
    91
22. Reduction of Macronutrient Concentrations on The In Vitro Growth of Red Ginger (Zingiber officinale) Betalini Widhi Haposari, Tri Mujji Ermayanti, Deritha E. Rantau, Rudiyanto
95
23. Morphological Variation of Echinacea purpurea (L.) Meench Accessions In Medicinal Plant and Traditional Medicine Research and Development Office Dyah Subositi and Fauzi
100
104
25. The Effect of 2,4D to The Formulation and Growth of Saga Callus (Abrus precatorius L) Developed from Seeds by In Vitro Propagation Deliah Seswita, Octivia Trisilawati
108

Efficacy
26. Efficacy of Temulawak (Curcuma xanthorrhiza Roxb.) Extract to Increase Blood T Lymphocyte Count in Obese Adults Mira Dewi, Cesilia Meti Dwiriani, M. Januwati, Muhammad Aries
113
27. Supplementation of Concentrate With Different Levels of Temulawak (C. xanthorrhiza, Roxb) on Milk Production of Lactating Frisien Holland Cows E. Sulistowyati, U. Santoso, and I. Badarina
116
28. Effect of Curcuma xanthorrhiza Roxb. Decoction on Glucose Absorption Level in Intestine of Male Rat of Wistar Strain Diah Dhanawaty D, Andreanus A. Soemardji, Samsudin Surialaga, Anna Martiana S., Ruslin
121
29. Antiplasmodial Activity Assay on the Combination of Curcumin and Mangosteen in Vitro against Plasmodium falciparum Strain 3D7 Culture Syamsudin, Mathilde Gonsali Djong
124
30. Potency of Curcuma xanthorrhiza Extract as a Natural Growth Promoter in Pregnant Ewes with Superovulation Andriyanto, Wasmen Manalu
128
31. Inhibitory Activity of Curcuma domestica, Curcuma xanthorrhiza and Zingiber zerumbet Mixed Extract in Proliferation of Colon Cancer Cells HCT (ATCC-CCL 116) Latifah K Darusman, Wulan Tri Wahyuni, Nuriman Zebua
131
32. Neuroprotective Effect of Temulawak (Curcuma xanthorrhiza) on Braine Nerve Cell Damage Induced by Lipopolysaccharide (LPS) Min Rahminiwati, Ita Djuwita, Latifah K Darusman, Siti Sa’dhah
134
33. Tekokak (Solanum torvum Sw.) Extract Potency as Tyrosinase Inhibitor Irmanida Batubara, Latifah K. Darusman, Irma H. Suparto, Trividila
138
34. Antioxidant Activity of N-Hexane Extracts of The Leaves of Soursop (Annona muricata L.) Eka Prasasti Nur Rachmani, Tuti Sri Suhesti
141
35. Toxicity and Antibacterial Effect of Solanum torvum (Tekokak) Leaves and Fruit Extracts. M Agung Zaim A, Yusrida Hasibuan, Nunuk Kurniati N, Irmanida Batubara
144
36. Potency of Keji Beling (Stachytarpheta mutabilis) and Soursop (Annona muricata) Extracts as HMGCoA Reductase Inhibitor Irmanida Batubara, Salina Febriany, Latifah K Darusman, Tohru Mitsunaga
146
37. Capacity of Soursop Leaves as Antioxidant, Antibacterial, and Tyrosinase Inhibitor Susi Indariani, Irmanida Batubara, Latifah K Darusman
148
38. Cytotoxic Activity of Zingiber officinale, Piper retrofractum, and Their Combinations on Breast Cancer Cell Line (T47D) Hendri Wasito, Trisnowati, Heny Ekowati
150
39. The Effect of Yellow Pumpkin Juice on Serum LDL/HDL Ratio in Male White Rat (Rattus Norvegicus) Fed with High Cholesterol Diet Harlady Dan Prabowo, Ismawati, Sri Wahyuni
153
40. Effects of Olfactory Stimulation with Scent of Cypress (Callitris glaucaophylla) Essential Oil on Brown Adipose Tissue Sympathetic Nerve Activity of Rat Ryunosuke Matsuoka and Tohru Mitsunaga
157
41. Biological Activities of Two Diterpenes from Jatropha Plants Sahidin, I; Ardiansyah; Muhammad Taher; Ajeng Diantini; and Marianti A. Manggau
161
42. Steroids from The Leaves of Erythrina variegata against Breast Cancer T47D Cell  
Tati Herlina, Unang Supratman, and Zalinar Udin  
165
43. Cat’s Whiskers Plants (Orthosiphon aristatus) Damaging Insects  
Tri Lestari Mardiningingsih  
169
44. Effect of Zingiber officinale and Piper retrofractum Extract Combination on Breast Cancer Cell Lines  
Heny Ekowati, Dinar Anggia Zen, Istiana Puji Utami, Hendri Wasito, Sunarto  
173
45. Free Radicals Scavenging Activities of Spices and Curcumin  
Widowati, Caroline T. Sardjono, Laura Wijaya, Dian Ratih Laksmi, Lusiana Darsono  
178
46. Inhibitory Effects of Selected Medicinal Plants against DPPH Radicals and Human LDL Peroxidation  
Fadila Chany Saputri, Ibrahim Jantan  
182
47. Antihyperglycemic Activity of Aqueous Fraction of Brucea Fruit (Brucea javanica (L) Merr) in Alloxan-induced Diabetic Rats  
Anna P. Roswiyem, Syamsul Fahal, Nourmala P. Agustyn  
187
48. Bio Pharmacy Potential of Begoniaceae (Begonia muricata Blume, B. multangu Blume, B. Baliensis Girmansyah) through In Vitro Antibacterial Test and Antifungal Test  
Hartutiningingsih-M. Siregar, R. S. Purwantoro, Sudarmono, Izu A. Fijridiyanto, A. Satyanti & A. Agusta  
190
49. The Bioactivity of Kaempferia galanga Extract Tested against Staphylococcus aureus and Escherichia coli bacteria  
Pertamawati  
196
50. The Effect of Jinten (Nigella sativa) Oil Treatment on Blood Cholesterol of High Fat Diet Fed Rats  
Sri Ningsih and Churiyah  
199
51. Antibacterial Active Compound from Berenuk Bark Extract (Crescentia cujete L)  
Suryani, Ahmad Yani, Elly Surahadiyusumah  
203
52. Utilization of Kolesom (Codonopsis javanica) as a Tonic at Gunung Jampang Village, South Garut  
Wardah and Francisca Murti Setyowati  
208
53. Anthelmintic activity of C. Aeruginosa on Adult Worm and Eggs of Ascaris Suum In Vitro  
Wiwin Sugih Utami, Bagus Hermansyah  
213
54. Antimalaria Activities of Artocarpus camansi Methanol Extract  
Yayuk Andayani, Dwi Soelistya, DJ, and Aliefan Hakim  
216
55. Effect of Andrographis paniculata Extract in Telomerase and p53 Expression In DMBA Induced Breast Cancer Rat  
Judhi Rachmat, Asep M. Ridwanuloh, Didik T. Subekti, and Ferri Sandra  
220
56. Profile of Jamu Consumption in Indonesia: An Analysis of 2010 Basic Health Research Data  
Yuyun Yuniar, Sudibyo Supardi, Max Joseph Herman  
224
57. Antitumor Potential of Ethanol Extract from Boesenbergia pandurata (roxb. Schlechter) Rhizome and its Combination with Doxorubicin against MCF-7 and MDBK cell lines  
Judhi Rachmat, Asep M. Ridwanuloh, Didik T. Subekti, and Ferri Sandra  
229
58. The Uses of Fabaceae from The Mount Gede-Pangrango National Park As Medicinal Plants  
Arifin Surya Dwipa I., Doddytrawan S. U., Fifit Juniarti  
234
59. Test of Antioxidant and Antiinflammatory on Standardized Kayu Angin (Usnea flexuosa, Tayl ) Extracts  
Esti Mumpuni, Ratna Layla G, Sudjaswadi W, , Lestari Rahayu  
237
60. Antibacterial Activity of Aceton Extract of Garcinia atroviridis against Escherichia coli, Staphylococcus aureus, Micrococcus luteus and Bacillus subtilis  
Ferry Effendy, Asep M. Ridwanuloh, Kartika Sari Dewi, Judhi Rachmat, Padmono Citoreksoko  
242
61. Toxicity Effect of Pilea melastomoides (Poir.) Bl Leaf Methanolic Extracts on MCF-7 and RAW 264.7 Cell Line Proliferation  
Fery Azis Wijaya, Rilianawati, Arifin Surya Dwipa Irsyam, Tarwadi  
245
62. Antiviral Activity OF Pseudocalymma alliceum (Lam.) Sandwith (Bawang Putih Anggur) Leaves Petroleum Ether Extract Against Newcastle Disease Virus  
Nuning Rahmatwati and Ratna Asmah Susidarti  
248
63. Potency Pluclhrea indica L. as Antimalarial against Plasmodium falciparum  
Tutik Sri Wahyuni, Aty widyawaruyanty, Retno Widyowati  
251
64. Extracts of Lempuyang Gajah (Zingiber zerumbet L.) Tea Infusion Reduced Blood Cholesterol Concentrations in Cholesterol-Fed Rats  
Sulistiyani, Dimas Andrianto, Raiza Ariyani  
267
65. **Antimalarial Activity of New Compound of 3β-Hydroxy-24-Ethyl-Propyl 5,22 Cholestadiene from Calophyllum inrasaptum**  
   Jamilah Abbas  
   253

66. **Bioactive Coumarin from the Leaves of Artocarpus altulis**  
   Jamilah Abbas, Djamilah, Nina Artanti  
   258

67. **Antioxidant Activity and Thin Layer Chromatography Profile of Achansas Ilicifolius L. Skin Barks Methanolic Extract, Water Fraction, Ethyl Acetat Fraction**  
   Diniatik, Wiranti Sri Rahayu, Endah Sukmawati  
   264

68. **Isolation, Identification and Tyrosinase Inhibitory Activities of the Extractives from Allamanda cathartica**  
   Kosei Yamauchi, Tohru Mitsunaga, Irmanada Batubara  
   271

### Technology

69. **Preliminary Study of "Param" Drying Process Using Solar Tunnel Dryer**  
   Swasmi Purwajanti, Lely Khojayanti, Olivia Bunga P., Hismiaty Bahu, Bambang Srijanto, Zainuddin, M.Djaeni, Eva Retno Wulan, and Sulistyo Wati  
   277

70. **Finger-Print Study of Leucaena leucocephala L. Leaves for Standardizing Traditional Medicine Extract**  
   Nurlatiwati, Tiur Dina Waty, Sri Murhandini and Winiati P Rahayu  
   280

71. **Innovation of Postharvest Technology To Improve The Quality of Simplicia Temulawak (Curcuma xanthorrhiza Roxb.)**  
   Retno Endrasari, Tamam Mas’adi  
   283

72. **Comparison of Various Extraction Methods for Curcuminoid in Curcuma xanthorrhiza roxb**  
   Hismiaty Bahu, Swasmi Purwajanti, Dianita L.Fauzana, Chilwan Pandji, Chaidir  
   288

73. **Effect of Harvesting Time On Rhizome, Volatile Oil and Xanthorrhizol Yield of Four Temulawak (Curcuma xanthorrhiza roxb.) Accessions**  
   Lukita Devy, Arief Arianto, Armelia Tanjung, Nadia Dwi Kartika  
   292

74. **Formulation and Physicochemical Characterization of Curcuma xanthorrhizaRoxb.-Loaded Chitosan Nanoparticle**  
   Dimas Andrianto, Laksmi Ambarsari, Mersi Kurniati, Waras Nurcholis, Latifah K Darusman  
   296

75. **Application of Soft Independent Modelling of Class Analogies (Simca) To Validation of Pegagan Extract Using Tlc-Densitometric Profile**  
   Idha Kusumawati, Rista Primaharinasstiti, M. Januwati  
   300

76. **Research on Kaempferia Galanga Extract for Cosmetic Use**  
   Martha Tilaar, Lip Wih Wong, Anna S. Ranti, Sjarif M. Wasitaatmadja, Hefriyan Handra, Suryaningsih, Maily, Fransiska D Junardy  
   303

77. **The Safety of Zingiber officinale Extract in Cosmetic Preparation**  
   Martha Tilaar, Lip Wih Wong, Anna S. Ranti, Sjarif M. Wasitaatmadja, Hefriyan Handra, Suryaningsih, Maily, Fransiska D Junardy  
   306

78. **Application of Multivariate Analysis to Identify Biomarker of Kaempferia galangal L**  
   Risa Kusumawati, Lusiana Arifianti  
   308

79. **Bootstrapping Jamu Dataset to Examine Assignment Consistency of Plants to Jamu Efficacy**  
   Farit Mochamad Afendi, Sulistiyan, Aki Hirai, Md. Altaf-ul-Amin, Hiroki Takahashi, Kensiuke Nakamura, Shigeiko Kanaya  
   312

80. **In Silico Study Thymoquinone Derivatives as Potential Inhibitor of Polo-like kinase 1 (Plk1) Using Molecular Docking Approach**  
   Faridayani, Harry Noviardi  
   318

81. **Antimitotic Compounds of Lakka-Lakka (Curculigo orchioides) Rhizome Methanol Extract**  
   Gemini Alam, Sudarmin M, Abdul Rahim, Muh. Akbar Bahar and Rosany Tayeb  
   323

82. **Genomic DNA Isolation of Three Varieties of Graptophyllum pictum (L.) Griff**  
   Harto Widodo and Dyah Subositi  
   327

83. **Analytical Method for Quercitrin in Scurrula atropurpurea (BI) Dans.**  
   Tiur Dina Waty, Lince Yarn, Sri Murhandini and Winiati P Rahayu  
   331

84. **Effect of Extraction Condition for Andrographis paniculata Leaves on the Extract Quality**  
   Hernani and Makmun  
   334

85. **Isolation and Identification Antibacterial Compound from Diethyl Ether Extract of Daun Sendok (Plantago major L.)**  
   Ahmad Najib, Gemini Alam, Musdalifah  
   340
86. Intraspesific Variation of Daun Ungu (Graptophyllum pictum (L.) Griff) Based on Molecular Characters in Medicinal Plant and Traditional Medicine Research and Development Office
Dyah Subositi and Harto Widodo

87. Development of Radiopasteurization Technique on the Production of High Quality Pegagan (Centella asiatica L.) Herb
Rahayuningish Chosdu, Nikham, Dien Puji Rahayu, Taty Erlinda, Dewita Agus

88. Cost Analysis of Storage Ginger Seed Rhizome At Different Altitude
Ermati and Sukarman

Toxicity

89. Cytotoxicity of Euricoma longifolia Extract against Normal and Cervix Cancer Cell Line
Rilianawati, Susi Kusumaningrum

90. Study of Cytotoxic Activity of Ethanol Extract Of Black Cumin (Nigella sativa L.) Seeds and Doxorubicin Combination Against Mcf-7 and Mdbk Cells
Judhi Rachmat, Hariyatun, Andri Leeman, Dian Ratih and Ferry Sandra

91. Cytotoxic Effect of Ethanolic Extract of Centella asiatica (L.) Urb. In Single and Combination Dosages With Doxorubicin Against Mcf-7 And Mdbk Cells
Judhi Rachmat, Kartika Sari Dewi, Dian Ratih L. and Ferry Sandra

92. Biological Activity Test of Extracts and Fractions There of Keladi Tikus Leaves (Typhonium flagelliforme (Lodd) Blume
Yunahara Farida, Wahyudi Priyono Suwarso, Wahono Sumaryono

93. Preliminary Cytotoxic Activity of Ethanolic Anredera cordifolia (Ten.) Steenis Leaf extracts with Different Concentrations of Ethanol
Chuniyah, Tarwadi, Ferry Azis Wijaya
